FOR IMMEDIATE RELEASE

## **Astroscale UK Appoints Kumar Singarajah as Director of Government & Regulatory Affairs (UK & Europe)**

March 30, 2020 - Astroscale Ltd. ("Astroscale UK"), the market-leader in developing a space debris removal service to secure long-term orbital sustainability, has announced the strengthening of its management team with the appointment of Kumar Singarajah as Director of Government & Regulatory Affairs (UK & Europe) effective 23 March 2020.

Kumar joins with 30 years experience in senior positions in the space and telecommunications sectors with companies such as Avanti Communications, ICO Global Communications, Global, Inmarsat and SES ASTRA. He is the current chair of the joint techuk/UKspace Satellite Telecommunications Committee and a faculty member of the London Institute of Space Policy and Law.

In his new role, Kumar will lead governmental, regulatory and space policy matters with UK and European government organisations and will work closely with John Auburn, Chief Commercial Officer and Managing Director, UK, as well as the Global Policy team.

"Kumar will be a real asset to Astroscale UK. With his invaluable experience and knowledge, he will be able to help us to move the company forward in critical areas such as licensing and spectrum, as well as many policy issues," said John. "He has an extremely relevant and impressive track record and we welcome a renowned leader to the company."

On his appointment, Kumar said, "Astroscale is a pioneering international company at the vanguard of real-world efforts to enable the sustainable use of space and to combat the growing pollution of the space environment by space debris. It is a real privilege to join the Astroscale UK team and to support the company's inspiring mission."

### **About Astroscale**

Astroscale is the first private company with a mission to secure long-term spaceflight safety and orbital sustainability for the benefit of future generations. Founded in 2013, Astroscale is developing innovative and scalable solutions for satellite end-of-life and active debris removal services to mitigate the growing and hazardous buildup of debris in space. Headquartered in Japan with offices in Singapore, the United Kingdom and the United States, Astroscale is a rapidly expanding venture company, preparing to solve a growing environmental concern.
